

Advanced Better Communications NZ

the radio communication specialists

Rent a Radio

Two-way radios are an excellent alternative to mobile phones and they are easier and cheaper to rent than purchase if you so choose.

For example, unlike mobile phones, radios can legally be used while driving.

They are also:

- Lightweight,
- Easy to use just like mobile phones,
- Available to multiple users,
- Have no ongoing fees or charges, and
- Renting will eliminate getting caught up in the need for a technology upgrade.

Our short or long term rental service will give you peace of mind as our technical support will be there with you for the duration of the rental term. You will also have the advantage of keeping pace with any advances or new innovations in radio technology and no worries about upgrade expenses.

ABC NZ is always happy to bring some radios to you for a Field Trial Test.

Our services

- Mobile and Portable Two Way Radios
- Marine Radios
- Tait, Hytera, Motorola Sales and Services.
- Two Way Radio Rentals especially Intrinsically Safe & Trunking Radios
